

Anzul Ahammed S

IT GRADUATE | ASPIRING SOFTWARE ENGINEER | PYTHON & AI ENTHUSIAST

+91 90376 09221 · anzulahammed02@gmail.com · Palakkad, Kerala 678503

Motivated MCA graduate with a solid foundation in computer applications and a strong interest in Python development, Artificial Intelligence, and web technologies. Practical exposure gained through academic projects and internships involving AI-based systems, Python scripting, and WordPress content management. Known for a fast-learning, detail-oriented approach and the ability to pick up new tools and frameworks quickly. Seeking an entry-level Software Engineer or Associate Software Engineer role to apply technical skills, contribute to real-world projects, and grow within a professional IT environment

EXPERIENCE

WordPress Content Manager

PsFiles.com, Packagemockup.com, Xdfiles.com

— Managed and updated WordPress-based content, maintaining web pages and digital assets across multiple client sites

Python Internship

Safe Technologies

— Received hands-on training in Core Python fundamentals and application-level scripting

Project Internship

Upscale School of Advertising

— Developed and presented an AI/ML-based career guidance system as the internship deliverable

EDUCATION

Master of Computer Applications (MCA)

2024 – 2026

Nehru College of Management, Bharathiar University

Bachelor of Computer Applications (BCA)

2020 – 2023

VV College of Science & Technology, Calicut University

Higher Secondary (Biology Science)

2018 – 2020

Muslim Higher Secondary School, Kerala State Board

SSLC

2018

Muslim High School, Kerala State Board

SKILLS

- Programming Languages: Python · PHP · HTML5 · CSS3 · JavaScript
 - Web & CMS: WordPress · Basic Web Development
 - AI Productivity Tools: ChatGPT · Claude.ai · Gemini · Prompt Engineering · n8n
 - Development Frameworks: Streamlit
 - Soft Skills: Communication · Quick Learner · Team Player · Adaptability
-

PROJECTS

Workers Searching Panel

- Designed a web-based platform enabling users to search for and directly contact local service workers such as electricians, plumbers, and mechanics without intermediaries
- Built the concept to bridge the gap between service seekers and local service providers, improving accessibility for community-based services

Smart Career Guidance System

- Developed an AI/ML-powered web platform to help rural and semi-urban youth identify suitable career paths through skill profiling and psychometric assessments
- Combined a rule-based expert engine with machine learning models to generate personalized, explainable career recommendations
- Implemented the platform using Streamlit and a lightweight web stack to keep it accessible and low-cost to deploy

Smart Agriculture Management System

- Designed a precision farming platform integrating IoT sensor data, AI-based crop recommendations, and weather forecasting for small and medium-scale farmers
 - Included market intelligence and community collaboration features aimed at improving agricultural productivity and farmer livelihoods
-
